Hi Jeff,

We are aware that the regulation.gov website is experiencing technical difficulties. We have been told that they are working to remedy the situation, and that it should be resolved within about a day. In the meantime, we were given this alternate website address to provide to commenters. <https://beta.regulations.gov/docket/EPA-R08-OW-2019-0512>

Please let us know if you are still not able to submit comments through this site.

Valois

Subject: Dewey-Burdock UIC public comment site inoperable

Good afternoon Ms. Robinson – I assume you are aware that the public comment submission website for the Dewey-Burdock draft UIC permits and aquifer exemption is inoperable today. Can you let me know how EPA intends on remedying this problem, be it an extension of the comment period or otherwise? The Oglala Sioux Tribe and other interested parties have comments to submit, but in the Tribe's case, the documents are quite large and are unlikely to be able to be easily transmitted through email. Thank you for your prompt attention to this matter.
